ABOUT ME

I'm Sandaru Peiris, a third-year Software Engineering undergraduate at SLIIT. I'm passionate about full-stack development and creative problem solving. I love designing and building amazing digital products—from interactive web apps to solid mobile apps—that as a user, you enjoy using and that solve real-world problems. I have not been a full-stack developer for long, and I am always on the lookout to broaden my experience and knowledge, and happy to learn some more about technologies like JavaScript, React, Node.js, Java and Python, in order to combine creative skills with technical skills for maximum effect. I am looking for industry experience through internships, working with diverse teams, and learning while contributing to worthwhile projects.

EDUCATION

2023 - Present

BSc. (Hons) Information Technology specializing in Software Engineering

Sri Lanka Institute of Information Technology (SLIIT), Malabe

2018 - 2022

- VS Code

SOFT SKILLS

- Discipline
- Problem Solving
- Honesty
- Critical Thinking
- Leadership
- Collaboration
- Adaptability
- Time Management

PROJECTS

06/2025 - 08/2025

The Daily Herald – AI-Powered News Aggregator

Designer & Developer | Next.js | Full-Stack Solo Project

The Daily Herald is a web-based news aggregator built with Next.js that ingests RSS/Atom feeds from multiple sources and automatically republishes curated articles. Admins can add and manage feeds from a secure dashboard; incoming items are de-duplicated, categorized, and rewritten into concise, SEO-friendly summaries using Gemini AI before being scheduled for publication on the site. The platform provides automated publishing, tagging, search, and analytics to deliver a fast, trustworthy, and continuously updated news experience.

02/2025 – 05/2025

EduConnect – Online Education Management System

Team Leader | MERN Stacks | Y2 S2 Project

EduConnect is a web-based application designed to simplify and enhance the administration of educational services for schools, colleges, and independent tutors. It provides a centralized platform to manage students, teachers, classes, subscriptions, and academic content with efficiency and security.

02/2025 – 04/2025

Bankify – Financial Tracker App

Lead Developer | Kotlin | Individual Project

Take control of your finances with Bankify, the ultimate app for managing your money effortlessly! Whether you're tracking daily expenses, setting budgets, Bankify empowers you to achieve your financial goals with ease and confidence.

CERTIFICATES

- Introduction to Generative AI – Google
- C for Beginners – Great Learning
- Intro to AI-driven SEO – Le Wagon
- Intro to Git & Github – Le Wagon
- Intro to Python – Le Wagon
